NOTIFICATION TO LEAD REGULATORY AGENCY (LRA) OF REMEDIATION ACTIONS BEING CONDUCTED AT ROCKY FLATS ENVIRONMENTAL SITE (RFETS) - CLG-064-97

PURPOSE

The purpose of this letter is to provide notification of planned remediation action regarding Building 123 at RFETS.

DISCUSSION

Building 123 has been identified to RMRS as part of its current work scope for decommissioning. The following information is provided to you to assist in your notification of the LRA as documented in the Rocky Flats Cleanup Agreement (RFCA).

This project, the decommissioning of Building 123, is funded for planning and preparation in this fiscal year. This scope consists of characterization, planning and engineering, asbestos abatement, furniture and equipment removal, and a Proposed Action Memorandum (PAM) for the dismantlement and demolition of Building 123, removal or in place stabilization of buried process waste lines, and remediation of contaminated soil beneath or adjacent to the building. Site procedures will be utilized to assure compliance in these actions.

The dismantlement of building systems/utilities and demolition will be completed between October 1997 and January 1998, unless the project can be accelerated. The scoping characterization is in progress and will be completed by April 30 with a copy provided to you.

A scoping meeting was held April 1, 1997 between DOE, K-H, CDPH&E, EPA, and RMRS. The following scoping was provided:

1. PAM will be completed for the Demolition and Dismantlement scope of Building 123 (B123). The removal of furniture and equipment/files associated with the current scope of the groups operating Building 123 will not be covered by the PAM. The asbestos abatement in B123 will be conducted outside the PAM.
2. The scope of this project will include the two IHSSs associated with that building.
